1. Introduction to Bankline SWIFT export – 2012 version

1.1 What is Bankline SWIFT export – 2012 version?

This user guide details how each of the individual SWIFT export files are structured and has been updated to include the 2012 versions of our MT942 and MT940 formats. If you are still using the previous versions of these formats, please obtain the 'Bankline export file layout guide – SWIFT format' guide from:

[Account information user guides](#)

Bankline allows your business to manage everyday banking over the internet, including the ability to view account information, payment details and user profiles. Bankline export enables you to export much of that information in SWIFT format that can then be accessed outside of Bankline.

Bankline SWIFT supports the export of:

- account information for account set
- payment advices

1.2 How are Bankline SWIFT export files structured?

Bankline supports the following exports formats:

Account information for account set

- MT940 Customer Statement Message
- MT942 Interim Transaction Report

To ensure you obtain the 2012 versions of the above formats make sure that you select one of the following when requesting your Account Information for Set export from Bankline:

- MT942 – 2012
- MT940 & MT942 – 2012
- MT940 – 2012

For more information on how to export this information please refer to the 'View account balances and account set information' guide available from the Bankline Training and Support site

Payment advices

- MT900 Confirmation of Debit
- MT910 Confirmation of Credit

SWIFT format export files are in [.TXT] text file format.

Each export file is structured in line with the rules specified by SWIFT for the message type but Bankline provides greater flexibility in relation to user specified date ranges and multi-format extracts for MT900 & MT910 and for MT940s & MT942. The table below summarises the reporting for MT940 & MT942:

Date range	File format
Today - today	MT942 – 2012
Date in the past - today	MT940 & MT942 – 2012
Date in the past - date in the past	MT940 – 2012

A single export file may contain multiple messages. In these circumstances Bankline separates each message with a hyphen ("-").

2. Export files

2.1 SWIFT format debit advice – MT900

The default file name is **Pay_adv_DD-MM-YY_HH-MM-SS.txt** and the export file is structured like this:

Field reference	Field Tag and size	Field name / description	Comments
1	:20:16x	Transaction Reference Number	
2	:21:16x	Related Reference	
3	:25:35x	Account Identification	
4	:32A:6!n3!a15d	Value Date, Currency Code, Amount	Sub field Value Date reported as YYYYMMDD
5	:52a:[/1!a][/34x] 4*35x Party Identifier Name & Address	Ordering Institution	Ordering institution is reported in SWIFT format D.
6	:72:6 * 35x	Sender to Receiver Information	

Sample file: :20:1497
:21:SJ URG INT JPY
:25:123-00-12345678
:32A:100212JPY2106

2.2 SWIFT format credit advice – MT910

The default file name is **Pay_adv_DD-MM-YY_HH-MM-SS.txt** and the export file is structured like this:

Field reference	Field Tag and size	Field name / description	Comments
1	:20:16x	Transaction Reference Number	
2	:21:16x	Related Reference	
3	:25:35x	Account Identification	
4	:32A:6!n3!a15d	Value Date, Currency Code, Amount	
5	:50a:[/34x] 4*35x Party Identifier Name & Address	Ordering Customer	Ordering customer is reported in SWIFT format K If field 5 is populated then field 6 will be blank Field 6 will be populated only when field 5 is blank.
6	:52a:[/1!a][/34x] 4*35x Party Identifier Name & Address	Ordering Institution	Ordering institution is reported in SWIFT format D If field 5 is populated then field 6 will be blank Field 6 will be populated only when field 5 is blank
7	:56a:[/1!a][/34x] 4*35x Party Identifier Name & Address	Intermediary	Intermediary is reported in SWIFT format D only
8	:72:6 * 35x	Sender to Receiver Information	

Sample file: :20:1433
:21:SJ 8
:25:600001-12345678
:32A:100203GBP0,01
:50K:CLIENT LIMITED
TEST LOCATION OFFICES,
19 THE HILL,
LONDON EC1 1AA

2.3 SWIFT format customer statement – MT940 – 2012

The default file name is **Acc set name_file creation date & time_file format_file id .txt** and the export file is structured like this:

Field	Field Number Field name Subfield	Field Size & Format	Content	Comment
1	:20: Transaction Reference Number	16x	:20:yymmdd nnnnnnnnn	yymmdd = execution date nnnnnnnn = unique export file ID
2	:21 Related reference	-		Not used
3	:25: Account identification	35x	Domestic Accounts: :25:666666888888888	666666 = Sort Code 88888888 = Account number
			International Accounts: :25:aaaaaaaa-cccbbb666666	aaaaaaaa = Account identifier (max 8), followed by a hyphen then, ccc = Account currency (always 3) bbb = Suffix (max 3) 666666 = Sort code (always starts in 16th pos)
			External Accounts: 34x	Up to 34 characters
4	:28C: Statement Number / Sequence Number	11x	:28C:yynnn/1	yynnn = Julian / ordinal date of the start date in the range requested Sequence number always 1
5	:60a: Opening balance			
	1. D/C Mark	1x	D or C	
	2. Date	6n	yymmdd	Start date in the export range requested
	3. Currency	3x	GBP	ISO 4217 Currency code
	4. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules)
6	:61: Statement line(s)			
	1. Value date	6n	yymmdd	
	2. Entry date	4n	mmdd	
	3. D/C mark	1x	D or C	
	4. Funds code	-		Not used
	5. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules).
	6. SWIFT transaction type code	4x	NMSC	SWIFT Transaction Type Identification Code. SWIFT code to Bankline code mapping table in section 3.
	7. Reference for the account owner	16x	<i>CUSTREF</i>	Often contains useful information added by the sender of the payment, or perhaps the senders name if no reference has been provided.
	8. Account servicing institution's reference	16x	<i>//EBANKGO12345678</i>	Account servicing institution's reference (populated when present). When present is preceded by //.
	9. Supplementary details	34x		Supplementary Details (on separate line). Contains information for the account owner when Reference for the account owner is "NONREF"

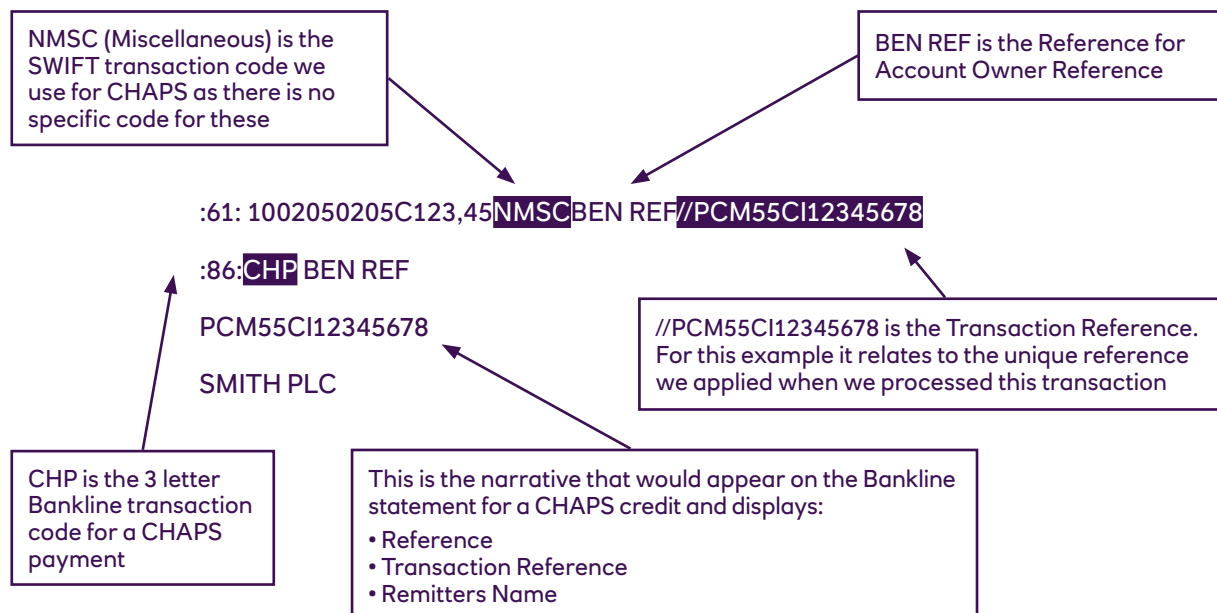

Field	Field Number Field name Subfield	Field Size & Format	Content	Comment
7	:86: Information to account owner	6*65x	xxx 25x	First line contains the 3 letter Bankline transaction code followed by a space and then the first transaction narrative.
			2..6 (max) 25x	Remaining narratives output in lines 2 to 6 (max).
8	62a: Closing balance			Closing balance always 62F
	1. D/C Mark	1x	D or C	
	2. Date	6n	yymmdd	End date or last completed working day in the export date range requested
	3. Currency	3x	GBP	ISO 4217 Currency code
	4. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules)
9	:64: Available balance			
	1. D/C Mark	1x	D or C	
	2. Date	6n	yymmdd	End date or last completed working day in the export date range requested
	3. Currency	3x	GBP	ISO 4217 Currency code
	4. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules)
10	:65: Forward available balance			Data corresponds to Bankline expanded balance details.
	1. D/C Mark	1x	D or C	
	2. Date	6n	yymmdd	End date or last completed working day in the export date range requested
	3. Currency	3x	GBP	ISO 4217 Currency code
	4. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules)
11	:86: Information to account owner	-		Not used

2.3.1 Sample MT940 – 2012 Files

The above file sample includes various transaction types and this is a break down of the narrative section for each item.

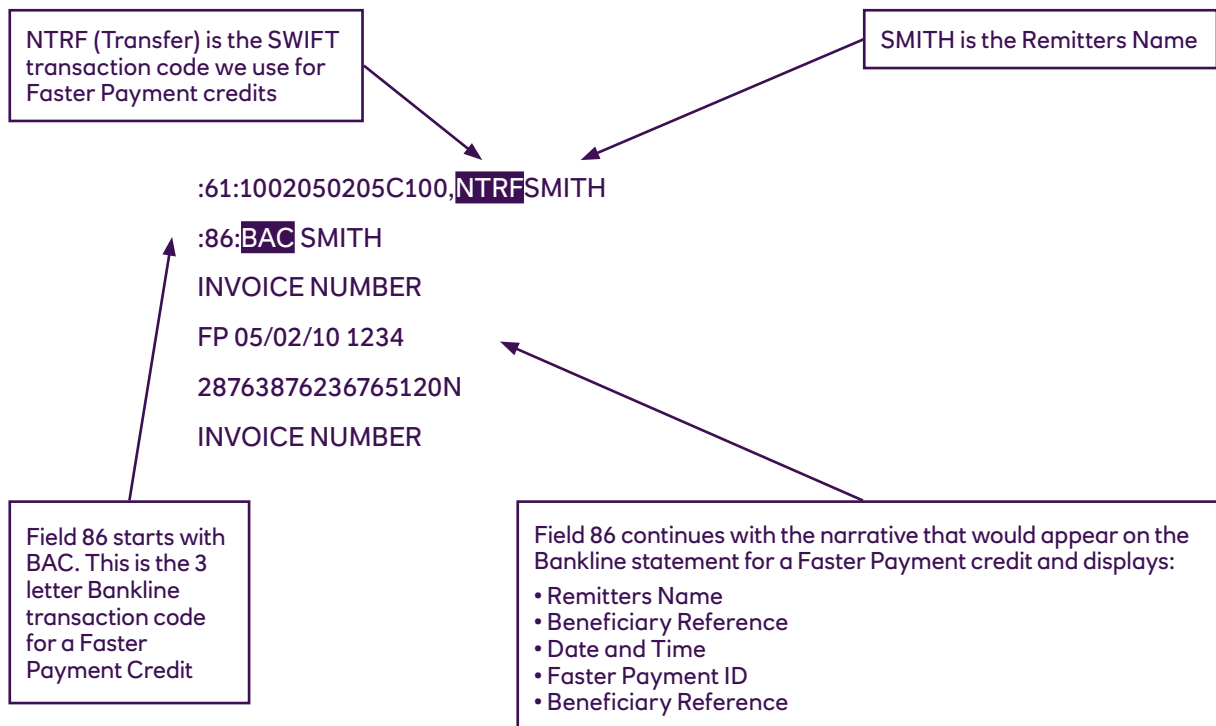

CHAPS Credit

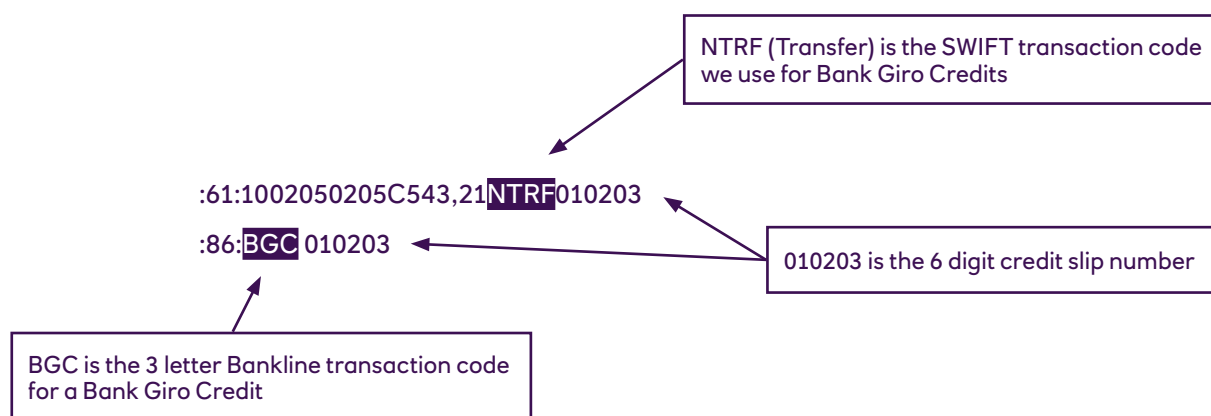

CHAPS Debit

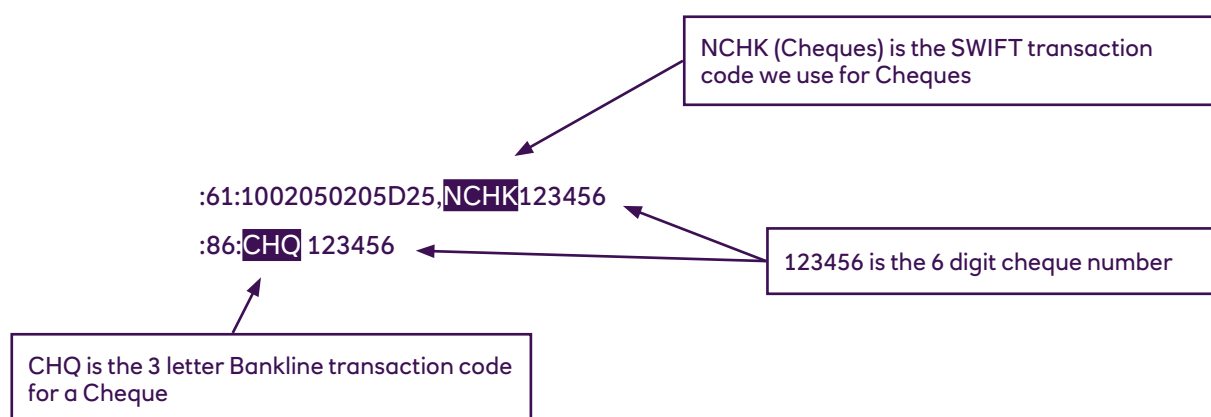

Faster Payment Credit

Bank Giro Credit

Cheque

The **SWIFT Transaction Code** and **Bankline Transaction Code** will vary depending on the Transaction type (see Section 3).

2.4 SWIFT Format interim transaction report – MT942 – 2012

The default file name is **Acc set name_file creation date & time_file format_file id .txt** and the export file is structured like this:

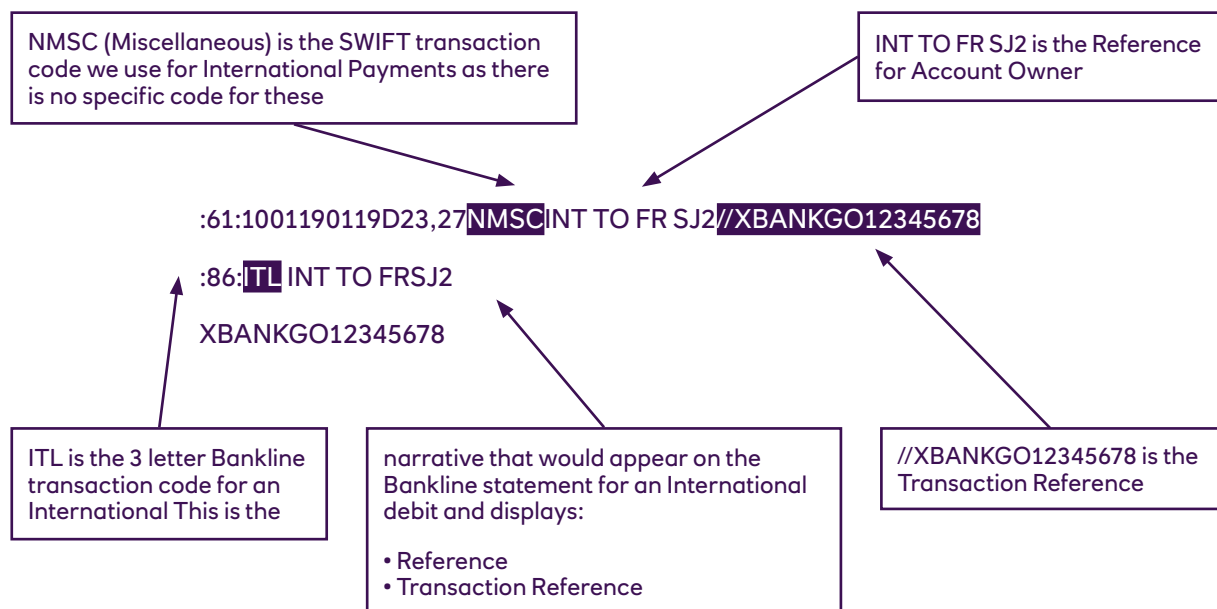

Field	Field Number Field name Subfield	Field Size & Format	Content	Comment	
1	:20: Transaction Reference Number	16x	:20:yymmdd nnnnnnnnn	yymmdd = execution date nnnnnnnnn = unique export file ID	
2	:21 Related reference	-		Not used	
3	:25: Account identification	35x	Domestic Accounts: :25:666666888888888	666666 = Sort Code 88888888 = Account number	
			International Accounts: :25:aaaaaaaa-cccbbb666666	aaaaaaaa = Account identifier (max 8), followed by a hyphen then, ccc = Account currency (always 3) bbb = Suffix (max 3) 666666 = Sort code (always starts in 16th pos)	
			External Accounts: 34x	Up to 34 characters	
4	:28C: Statement Number / Sequence Number	11x	:28C:yynnn/1	yynnn = Julian / ordinal date of the start date in the range requested Sequence number always 1	
5	34F: Floor Limit Indicator				
		1. Currency	3x	GBP	ISO 4217 currency code
		2. D/C Mark	1x	Not populated	
		3. Amount	15n	0,	Amount (includes decimal comma in accordance with SWIFT rules). Always 0, - no minimum debit or credit amount.
6	:34F: Floor Limit Indicator			Not populated	
7	13D Date / Time indication				
		1. Date	6n	yymmdd	Always current working day
		2. Time	4n	hhmm	Time of export execution
		3. Sign	1x	+	Always “+”
		4. Offset	4n	0000	Always “0000”
8	:61: Statement line(s)				
		1. Value date	6n		
		2. Entry date	4n		
		3. D/C mark	1x		
		4. Funds code	-		Not used
		5. Amount	15n		Amount (includes decimal comma in accordance with SWIFT rules).

Field	Field Number Field name Subfield	Field Size & Format	Content	Comment
	6. Transaction type code	4x	123,45	Transaction Type Identification Code. SWIFT code to Bankline code mapping table in section 3.
	7. Reference for the account owner	16x	NMSC	Often contains useful information added by the sender of the payment, or perhaps the senders name if no reference has been provided.
	8. Account servicing institution's reference	16x	CUSTREF	Account servicing institution's reference (populated when present). When present is preceded by //.
	9. Supplementary details	34x	//EBANKGO12345678	Supplementary Details (on separate line). Contains information for the account owner when Reference for the account owner is "NONREF"
9	:86: Information to account owner	6*65x	/xxx 25x	First line contains the 3 letter Bankline transaction code followed by a space and then the first transaction narrative.
			2..6 (max) 25x	Remaining narratives output in lines 2 to 6 (max).
10	:90D: Number and sum of entries			Number and sum of debit entries
	1. Number	5n	1	
	2. Currency	3x	GBP	ISO 4217 currency code
	3. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules).
11	90C Number and sum of entries			Number and sum of credit entries
	1. Number	5n	1	
	2. Currency	3x	GBP	ISO 4217 currency code
	3. Amount	15n	123,45	Amount (includes decimal comma in accordance with SWIFT rules).
12	:86: Information to account owner	-		Not used

2.4.1 Sample MT942 – 2012 Files

5. Glossary of terms

We've used these terms and abbreviations throughout this document.

Term / Abbreviation	Definition
BIC	Bank Identification code This is the structured code used by SWIFT to uniquely identify a financial institution, its country of operation, and its branches.
Sort code	The UK's national clearing code used to uniquely label a bank, branch or other financial institution. The sort code is registered in the industry database to show whether it is valid for use on standard domestic or urgent domestic (CHAPS) payments.
SWIFT	Society for Worldwide Interbank Financial Telecommunication SWIFT operate and regulate the secure network used to transmit many of the inter-bank electronic payment messages that will originate from Bankline.
Signed num	Numeric value preceded by (-) for debit values
